DATA SHEET: 100 x 100 x 3 mm SQUARE TUBE

SQUARE TUBING | (HOT ROLLED)

A square tube is a hollow section of hot-rolled, welded mild steel. Square tubing is typically stocked in 6 metre lengths and is available in various diameters and wall thickness sizes. The wall thickness of the tube indicates its strength. Square tube is easy to drill, weld and cut and can be galvanised to prevent corrosion. All tubing is produced in accordance with SANS 657-1.

Product application

Commercial quality square tubes are mainly used for non-structural purposes, such as in carports, gates, fences, palisades and also steel frames.

Specifications

- Outside Diameter: 100 x 100 mm
- Thickness: 3 mm
- Mass per meter: 9.166 kg/m
- Warrantee: 10 years
